

Problem:

Create a role in IAM

Procedure:

Go to aws.amazon.com;

Follow these steps mentioned below.

Create new role Role actions

Filter Showing 0 results

<input type="checkbox"/>	Role name	Description	Creation Time
No records found.			

Select role type

☒ **AWS Service Role**

- Amazon EC2**
Allows EC2 instances to call AWS services on your behalf.
- AWS Directory Service**
Allows AWS Directory Service to manage access for existing directory users and groups to AWS services.
- AWS Lambda**
Allows Lambda Function to call AWS services on your behalf.
- Amazon Redshift**
Allows Amazon Redshift Clusters to call AWS services on your behalf
- AWS Batch Service Role**
Allows AWS Batch to create and manage AWS resources on your behalf

☐ **AWS service-linked role**

☐ **Role for cross-account access**

Select required role type here.

Attach Policy

Select one or more policies to attach. Each role can have up to 10 policies attached.
